Inspire Dental

Who are we?

Inspire Dental, created in 2010 by a number of well known Irish General Dental Practitioners, is a group of Independent dental practices whose focus is to promote the best standards of family dental care for the people in our community.

We now have members spread throughout Ireland who are committed to our vision and are working diligently every day, along with their team members, to achieve it. Our members cooperate across a range of issues to improve their clinical outcomes, their practice efficiencies and the lives of themselves, their team members and their patients. We do this by sharing knowledge, tips, advice and recommendations in a truly open and transparent way which is unique in the industry in Ireland.

We are pleased to offer you the opportunity to join our organisation and to partake in a truly cooperative experience.

Are you ready to take the next step?

Inspire Dental

AUTUMN MEETING

Each Autumn we gather with our dental staff for a two day meeting. The Friday has a focus on the dental team and allows all members of a practice to learn together. It enables each staff member to be part of improvement and change in their own practice, and to meet and network with colleagues of other practices in the group. Friday night is a fun social gathering, and a reward for hard working staff. On the Saturday invited guest speakers cover various topics for the dentists in the group ; clinical, financial, and dento-legal.

SPRING MEETING

This is usually a team day where the focus is can be a particular area of compliance such as Infection Prevention and Control. In addition every two years dentists and their staff undergo a training course in Basic Life Support (CPR and Defibrillator use).

REMOTE MEETINGS

Several times a year the dentists in the group will gather for online sessions. These will often be focused on a particular area of regulation eg radiology or health and safety at work. We discuss how members can achieve compliance in simple and effective ways.

These member meetings were of enormous benefit during the recent Covid pandemic - helping to reduce isolation by sharing knowledge and resources, and practical tips in a time of constant change.

WHATAPP GROUP

Our work can be challenging to do well and we often work in isolation. The Inspire WhatsAPP group has been and remains an active daily support for the member dentists.

Among the membership there is a great depth of dental practice experience and knowledge - Clinical, Business, Patient Management, and Staff Management.

There is invariably a helpful and prompt response to any query or request. Valuable information, advice, and support are shared in an open way.

In the Inspire group we understand the importance of the Dental Team and see the benefits in including all staff members as we learn, improve and excel.

Attendance at our Autumn and Spring meetings are complimentary for members and staff .
